

Opera Mini

About Opera Mini

Opera Mini is a great app that allows any phone to get a full web browsing experience, for free. It lets you view full web pages on your screen, instead of the reformatted version that most mobile browsers give you. It also gives you a virtual mouse that you can use to zoom in on a certain area of the web page so that it becomes readable, and then select items on the web page. See the internet just as it appears on your PC, on any phone.

Cool Stuff

Change the screen orientation from portrait to landscape by pressing *#

Powerscroll- scroll faster by using 2,4,6, and 8 on your numeric pad, and use 5 to zoom in and out. This is faster than using your D-pad, though not as accurate.

Find-in-Page function lets you search for text on a web page!

Opera Mini is built for speed. Web pages are compressed by up to 90% of its original size for speed, saving your time & money.

Great Settings controls that give you great control over the features of Opera Mini, such as whether you want it to auto-complete addresses based on your bookmarks and history.

How Does it Work?

- The webpage is displayed in full size on your screen. You will see a small box on the screen centered on your virtual mouse.
- Move the mouse, the box, using either your D-pad, or numbers on your keypad. Zoom in on a particular area by pushing your Select key, or 5 on the keypad.
- While zoomed in you can easily read text, and click on buttons and links using the virtual mouse.
- Zoom out by pushing the Back soft key, or by pushing 5 on the keypad.

What does it cost?

Free (Data package recommended)

Lifestyle:

- ▶ Work
- ▶ Play
- ▶ Family

Operating System Requirements:

Windows Blackberry Symbian

How do I get it on my phone?

1. Visit the address **mini.opera.com** using your phone's default Web browser.
2. Follow simple on-screen download instructions.
3. After the download, locate Opera Mini on your phone among other Java applications and start enjoying the blazing-fast mobile Web.
