

Skyfire

About Skyfire

Sky Fire is a mobile browser that introduces, for the first time, imbedded flash (not to mention incredible speed!). This means the ability to watch Youtube videos, TV shows from Hulu.com, Flickr slideshows, and more. They all stream off the web right on your phone with Audio. The app is still in Beta mode so it does have a few minor bugs.

How Does it Work?

- Search/browse the web as you would on your home computer
- Access full web pages including flash
- View the full web page or zoom in for a closer view
- Great for viewing Youtube!

What does it cost?

Free
(Media Bundle Package recommend)

Lifestyle:

- ▶ Work ▶ Play ▶ Family

Operating System Requirements:

- ▶ Windows Blackberry ▶ Symbian

How do I get it on my phone?

- From your computer or your phone, go to <http://www.skyfire.com>
- Select your phone's operating system
- Enter your phone number. You will receive a text message shortly to complete the download.
- Click on the link in the message to download.
